Tom Woodin talk 'Working class writing and publishing in the late 20th century: literature, culture and community'

Event location: **Working Class Movement Library. 51 Crescent, Salford, M5 4WX**

Date: 27th Mar 2019

Event time: 14:00 to 15:00

Tom will discuss the emergence of working class writing and publishing workshops in the 1970s and their impact. Many working class people, including school #children, housewives, workers and others, all took up writing in order to express their feelings, understand their lives and promote change. New relationships between writers, audiences and publishers were developed while the issues of class identity and democratic organisation gave rise to considerable debate and disagreement. In attempting to develop new standards and cultural practices, workshops challenged mainstream institutions and elitism. These debates will be explored alongside examples of the writing that responded to broader social change.

This is a change from our original programme. Michael France's talk on the Library's new acquisition of a Reform Act scrapbook will take place at a later date.

This is part of the series of Invisible Histories talks. Admission free; all welcome.
